

Wholesale Dedicated Internet Access

Allegiance Telecom's Wholesale Dedicated Internet Access (WDIA) product is ideal for Carriers and Network Service Providers that sell DS1s to end users requiring Internet Access. By taking advantage of Allegiance's national footprint addressing 36 major metropolitan markets, Carriers and Network Service Providers can meet the needs of their end users without investing network capital.

Wholesale Dedicated Internet Access (WDIA) is available in two convenient configurations:

- WDIA Port includes the DS1 port (full 1.544 Mbps)
- WDIA with Loop includes the DS1 port (full 1.544 Mbps), local loop, and demarc extension

Optional service features and Customer Premise Equipment (CPE) are available with WDIA:

- DNS Hosting
- E-mail Boxes (5MB per box)
- Additional E-mail Storage Space
- CPE Rental with Managed Router

With WDIA, Carriers and Network Service Providers can leverage the Allegiance inter-connection agreements with the Incumbent LECs and provide both local loop and Internet access to their end users over our state-of-the-art Tier 1 backbone.

Ensuring reliable and responsive service, WDIA is backed by a strong Service Level Agreement (SLA). To view the Wholesale SLA, [click here](#).

Benefits

- Extends market reach
- Provides revenue-generating opportunities
- Enables you to purchase national services locally
- Simplifies pricing of dedicated internet access services so you can accurately quote service pricing to your end users
- Minimal operating costs by outsourcing network infrastructure
- Online ordering and order status
